

Ray and Daniel Everingham have chosen the BB9060 to complement their hay making business. With the big square baler they will now be able to offer their Hay customers premium hay in all bale configurations, small square, rounds and big squares. The New Holland BB9060 was chosen as a 8x3x3 is the most requested size from their customers. The baler was delivered with an inoculant tank fitted to maximize the baling window. A good price and backup and support from Goodwin Kenny's hay technician Merv Leard were an important part of the decision. Pictured is Daniel Everingham, Merv Leard (Goodwin Kenny Hay Technician) and Ray Everingham.

Paul Sheedy decided to update his existing New Holland BR740A this season to New Holland's latest model which offers increased reliability, easier servicing and is standard with an hydraulic reverser to quickly and conveniently remove blockages, generally without leaving the cab. Paul's trade BR740A baler will be available at our Gunnedah branch after some minor repairs, adjustments and detailing. Paul is pictured with his new New Holland BR7060 round baler.

Steve Eather of Baan Baa has chosen a New Holland H7230 Discbine mower conditioner to replace his Case IH unit. A new New Holland H7230 Mower Conditioner was chosen by Steve to upgrade his hay plant to reduce the risk of downtime and the potential crop loss through breakdown. The H7230 features a Bent Tongue Hitch standard drawbar with MowMax Cutterbar and Shockpro Hubs. The modular cutterbar has independently sealed units that are interchangeable. A range of cutting blades is available from reversible 7 degree pitch through to rock blades. The reliability of and back up for New Holland Mower Conditioners is also a standard benefit along with excellent resale value. Pictured at delivery is Steve, wife Berice and grandson Blake.

Barry and Jacqui Newcombe have some acres on the outskirts of Quirindi running cattle and horses. Barry's normal job is in the mines at the Hunter Valley and they were looking for a small utility tractor to make work easy on his days off. Barry and Jacqui visited the Ag-Quip stand this year and were impressed by the Workmaster 55 tractor and the ease of operation. The tractor was fitted with an AP30 Plus Front End Loader with a 4in1 bucket. Barry also took advantage of the low CNH Capital interest rate on offer which was the clincher for him in his purchase. Pictured left is Barry and Jacqui with their new delivery.

Controlled traffic farming has been practiced on the Breeza Plains for a number of years. Andrew Pursehouse of Breeza Station has been farming on 3 meter wheel centres for a number of years. Andrew's farms are in the process of converting to 4 meter controlled traffic farming and needed to upgrade his existing sowing rig. Andrew has recently taken delivery of a Gyrat Model 18-35 STR Trailed Rear 3 Bin Air Seeder. This machine has a purpose built 4 meter wheel centre with a Castoring Front axle and high flotation tyres. It has 3 x 1800kg seed bins to feed his 72 outlet Double shoot sowing kit. Pictured at right is Andrew with his new Air Seeder.

## Slasher Maintenance

As the slashing season starts it is wise to consider a few issues.

With the weather warnings for fires already in place, check if it is too dry to slash. If you must slash, ensure you have a large fire extinguisher fitted to the slasher and or the tractor. Check the area to be slashed is free from rocks or steel that could cause the spark to get a fire going.

Maintenance is the key to getting your slashing done without problems in a timely manner.

Without fail you should;

- \* **Gearbox** - Replace the oil at least once per year, more often if you are slashing larger areas.
- \* **Clutch** - Disassemble, check/clean and or replace the plates and reset the clutch.
- \* **Cutterbar** - Check the cutterbar and blade bolts for damage and cracks and that the bolts are tight.
- \* **PTO Shaft** - Check the uni-joints are not worn and loose, check that the shaft slides freely.
- \* **Safety** - Check the front and rear chains or rubber flaps are sound and not missing pieces.

When you do replace the blades, **ENSURE** you replace all of the bolts, bushes and nuts at the same time. Do not mix old and new blades as this will cause vibration and uneven cutting.

This routine maintenance could save you a significant amount of money in repair bills. Refer to the operator's manual for full details on gearbox oil and clutch settings or contact any of our branches for assistance. If it is easier, our Tamworth or Gunnedah workshops are able to carry out this maintenance for you.

### Challenge Blade for Mathew Dunbar

Mathew Dunbar was in need of a full function grader blade for use on his Walcha farm. The Challenge Implements CG300 is a 3m wide cut with full hydraulic tilt, angle and offset, this allows the blade to cut a drain to the side of the tractor not just behind like most other 3pl blades. Mathew will use this offset feature to cut in field drainage channels and also clean out and reshape the gutters on the gravel roads throughout the farm. The Blade is a full gusseted 8mm curved plate with reversible cutting edges. Two rear wheels can carry the blade for stability in operation and assist in producing a fine finish grading. At 930kg in weight the blade is suited to tractors of 90 – 180hp and with its substantial construction will do nearly all grading work on the farm. The blade can be reversed for back blading and pushing applications as well. Pictured left is Susan Goodwin, Mathew Dunbar and Tony Housden.

### Howard Alce 2300 Mulcher ideal for job at Barraba

Dean Myers and Danielle Faint called in after seeing the mulchers on display at Goodwin Kenny Tamworth. Dean and Danielle had been confused by the variety of mulchers they looked at while visiting Ag-Quip. We were able to clarify what they really needed and wanted to achieve with the mulcher on their farm near Barraba. With areas of high thick plains grass and other rank pasture a flail mulcher was seen as the best method to reduce the body of pasture, producing an evenly spread, finely chopped mulch which breaks down quickly to return nutrients to the soil, build up soil organic matter levels – leading to better soil structure and microbial activity – ultimately this reduces inputs and increases pasture production. The Howard Alce 2300 was chosen because of its robust construction, high body to handle the bulk, 'Y' flails with fixed chop bar to produce finer mulching and trailing wheels to provide varied cutting heights. Pictured right is Dean Myers.

## AGQUIP WAECO FRIDGE WINNER

The winner of the Waeco Fridge draw is: Graham Kent, Somerton, pictured collecting his prize from Mark Kenny at Goodwin Kenny Gunnedah.

T1510 - 31HP  
\$22,550 - inc GST

Boomer 1025 - 26 HP  
\$22,660 - inc GST

T1530 - 45 HP  
\$25,850 - inc GST

Talk to Tony about Compact Tractors in stock at Tamworth - all fitted with Challenge Front End Loaders & 4in1 buckets and canopies.

We are also the authorised dealers for:

Don't forget that our Tamworth & Gunnedah stores are open Saturday mornings from 9am to 12pm.

**BALER TWINE & ROUND BALER NET IN STOCK**

Also available for Small Square and Large Square Balers

## TOY OF THE MONTH

New Holland  
TR88 & CR9040  
Past & Present  
Combine Set  
Scale: 1:64

P/N: ERT13753DS  
\$47.00 inc GST

It's that time of the year again - **Silvan Spring Specials!**  
So call into Spare Parts between 10 September to 30 November 2012 and take advantage of the savings like this:

## 12 VOLT DIESELPRO - 200 LITRE

Was \$1,129.00

P/N: SQDN200L-X1

DieselPro Features:

- ◆ UV Stabilised diesel grade polyethylene polytuff tank
- ◆ 12 volt Piusi self-priming pump, 45 L/min open flow
- ◆ 5 metre hose and auto shut-off trigger nozzle
- ◆ Lockable filling lid and cover

\* Silvan Specials Disclaimer: Prices include GST, exclude dealer installation and/or freight charges.

**HAY & SILAGE IMPROVER - HY-SI** is a preservation management tool that works by accelerating the conversion of sugar to organic acid (pickling agent). HY-SI contains no living bacteria, but does contain nutrient rich fermentation by-products, enzymes and a completely non-toxic form of cobalt resulting from the Dextro-Lac process.

By creating lactic acid more rapidly, more energy and protein is preserved in hay and silage for increased milk and meat production.

Part No: HY-SI10

\$187.00 Inc GST

## MONTHLY WINNERS

Congratulations to our New Holland **PINK** Cap Winners:

CW Morgan — Walcha, J & JC Johnston — Coonabarabran, PS & RM McRae — Duri

This month we have 3 NEW HOLLAND **PINK** Caps to give away - simply return your payment by Thursday 25th October 2012, to go in the draw.

We would also remind customers that we accept Visa & MasterCard over the phone and Debit cards may be used at all our Branches.

All payments by these methods are included in the monthly draw.

Electronic/Internet Payments on the last day of the month cannot be allocated until the next day - it would assist us greatly if payments could be made prior to the last day of the month to allow receipting and allocation to accounts prior to Month End.....thank you.

For customers that use Internet Banking, our bank account details are:

**Commonwealth Bank**

**BSB: 062 602**

**Account Number : 00 272 029**

Please use your account number, name or invoice number as a reference.

## JOKE OF THE MONTH

And God promised men that good and obedient wives would be found in all corners of the world.

Then He made the earth round....and laughed and laughed and laughed...

Friday 12th October  
2012 at 6.45pm  
West Diggers  
\$200 per table of 8

Contact:  
Richard Frazer at  
rfraser@tpg.com.au  
for more information  
or to book a table.

**FANTASTIC  
PRIZES!!**

With five games to go in the season the **Tamworth Kangaroos** needed five wins to finish on top in 2012. Unfortunately they fell at the last hurdle going down to Armidale in their last round game putting them on equal on points with Inverell, who's superior percentage put them into second. Kangaroos hosted a home Semi Final against Gunnedah at No 1 Oval on Saturday 18th August and won this game, placing them in the Quarter Final match up with Armidale. They lost this game and finished third in the competition for the 2012 season.

On a brighter note two young Roos stars took out the big awards at the TAFL Presentation Night. Lachie Maloney was awarded the Rising Star Award, whilst Alex Hudson took out the Gillies Medal for Best and Fairest in the League.

A fantastic achievement, the Roos now have four Gillies Medallists in their present line up in Matt Hodge (2011), Tim Cotter (2008) and Cameron Douglas. Goodwin Kenny, as Sponsors, attended the Kangaroos Club Presentation Night on 15th September and had a great night. The Rising Star for 2012 was Daniel Gimbert (pictured receiving his award from Susan Goodwin). The Roos are looking for more players for the 2013 season - if you are interested contact Tim Cotter on 0429 447307 or email [tim.cotter@mac.com](mailto:tim.cotter@mac.com)

Tamworth Business Chamber held their annual **Quality Business Awards** on Friday 21st September and Goodwin Kenny were a finalist in the Retail - Large Employer category. Our congratulations to Choices (Carpet Choice) who were the winners of this category. In previous years Goodwin Kenny has been a finalist on five occasions and has won the Excellence in Rural Industry Award in 2007 and 2010. After reading the criteria for the awards this year we decided to nominate a couple of our farming clients in the Rural Industry category. Our nominees were Helen Cowdery, Tindaroo Partnership at Nundle and the Coxhead family - Ian and Liz Coxhead and Bruce and Wendy Coxhead trading as Tamworth Fodder Farms from Nemingha. Tindaroo Partnership and Tamworth Fodder Farms were both Finalists in the Rural Industry category along with Baiada and Bede & Narelle Burke, Glenwarrie Partnership. Tamworth Fodder Farms were the winners in two categories - Excellence in Environmental Commitment and Excellence in Rural Industry. Pictured is Tony Housden, Liz and Ian Coxhead, Susan and Gina Goodwin.

*Susan Goodwin....*
