

A new New Holland BR7060 Round Baler will enable Anthony Martin, "Maranoa", Purlawaugh to better manage his fodder preservation program being able to take advantage of crop and weather conditions to maximise both yield and quality. Anthony is pictured with his new BR7060 at delivery.

Stephen Hitchcock has been using a 2 wheel drive David Brown Tractor for a few years and decided it was time to upgrade to a small tractor with a Front End Loader and 4in1 bucket to look after his block (and his back) at Daruka. After looking at the various options available Stephen decided that the New Holland T1530 tractor would be the most suitable based on competitive price, reliability of service, local based service and brand name. The New Holland T1530 is 45hp with a 12Fx12R transmission, synchro Forward-Reverse shuttle. The tractor is fitted with a Challenge loader, 4in1 bucket, Ag tyres and canopy to carry out a wide variety of tasks with ease on the farm.

Pictured: Tony Housden – Goodwin Kenny Salesman & Stephen Hitchcock at start up.

After a few years of baling with a New Holland 568 baler purchased "used" from Goodwin Kenny, David & Robyn Robertson decided to upgrade to a new machine purely for reliability, not that the 568 had any problems, it is just getting on in years. The New Holland BC5060 was chosen because of its ability to produce great bale shape and even density with limited down time due to reliability of operation. The service back up from Goodwin Kenny's Hay technician Merv Leard was also a key factor in the decision. The New Holland BC5060 was fitted with hydraulic swing kit to make it easy to convert to travel position; it was also wired and plumbed for the accumulator that is towed behind. David and Robyn produce primarily Lucerne hay for a very select horse clientele in Sydney from their Timor farm in the Upper Hunter.

Derrick Roach of Everneat Mowing and Maintenance has been running a number of out-front mowers for commercial and domestic mowing and has decided to do some of the rougher mowing and paddock tidying with a tractor and slasher. After finding a reliable old MF175, Derrick looked at a number of 2100mm (7') slashers before deciding that the Jarrett Heavy Duty Series Slashers offered the best balance between robustness and cost. (The resale value of the Jarrett name was another factor in its favour). The Jarrett HD210 has a 100hp gearbox, clutch and PTO shaft, 8mm edge angles, 16mm deck bracing and backstays all fitted to a 5mm deck. Front Chains, Rear Rubber deflector flaps and a 4 plate clutch assist with the safety of the machine. Contact Derrick on 0428 369 168 for your slashing/mowing jobs either large or small.

Ron and Meg Kirby, "Roanoke", Curlewis have taken delivery of a new Howard 4.2m Spearhead 420 three point linkage folding wing slasher. The Spearhead is fitted with mulching blades and wing height control wheels, and will be used for stubble management and general maintenance. Pictured right at delivery is Ron Kirby.

After many years of service, Armidale High School's 3pl Finishing mower was finally due for replacement. Given that the school was set up for the mower's use, it was decided a new version of the same thing would be the easiest way to mow grass safely and efficiently. The Howard SM180 (1800mm/6' cut) was chosen for its quality European build, reliability and parts and service back up of both Howard Australia and Goodwin Kenny. The finishing mower is belt drive with 4 wheels to set accurate cutting height and a floating hitch to allow the mower to follow ground contours. These features ensure that the mower gives a great cut and the fields and surrounds have a nice even finish to them.

Goodwin Kenny have stocks of Jarrett Slashers, Howard Nuggett Slashers and Howard Mulchers

GOODWIN KENNY—Serving agriculture since 1962.

Boom Spray Nozzles Don't Last Forever

Your boom spray nozzles are one of the most neglected items on your farm, they are very crucial to the correct application of your crop chemicals.

Not only are worn nozzles going to cost you more money in wasted chemical, you will also be wasting money as lost income from missed spray areas (weeds and insects survive) and/or crop growth suppression through overdosing some areas of the crop or pasture.

If your nozzles are more than 2-3 years old and doing a few acres each year you NEED to test the outputs now.

While to your naked eye the nozzle orifice "looks fine" in some cases even a day or so of spraying can cause wear in the orifice sufficient to force replacement.

The best way to check if a spray nozzle is excessively worn is to compare the flow rate from your existing nozzles to the output from a brand new nozzle of the same type and colour. The output pattern is harder to check in the field, but if in doubt just replace the nozzles.

How to do it?

Wearing Gloves - Remove nozzles and strainers - clean and rinse both nozzle and strainer, an old toothbrush can be useful to help. Refit to the boom.

Fit 1 new nozzle somewhere on the boom.

Set the sprayer going with clean water in the tank at the same pressure you would normally use for your spraying. Check the output from the new nozzle - measured into a jug over 60 seconds, record this and then check all the other nozzles.

If the outputs vary by more than 10%, either to the new nozzle or between the old nozzles, discard the nozzles and fit a full set of new nozzles.

If you are unsure of any aspect of your booms performance call one of the Goodwin Kenny branches for professional assistance on your sprayer and maintenance

Like your old SICKLE BAR Mower
Conditioner?

Would you like a new one?

For those farmers who have a specific need or desire to run a Sickle Bar mower conditioner, New Holland currently have a small number of 488 Side Pull mower conditioners in Australia available for delivery. These machines have a cutting width of 2.82m (9'3"), Chevron pattern rubber conditioning rollers, Bolt on knife sections. With an operating speed of up to 13km/h the 488 only requires a tractor with 35 pto Hp.

Call us today for a price for this seasons delivery.

Small Square and
Large Square Balers

HAY & SILAGE IMPROVER

HY-SI is a preservation management tool that works by accelerating the conversion of sugar to organic acid (pickling agent). HY-SI contains no living bacteria, but does contain nutrient rich fermentation by-products, enzymes and a completely non-toxic form of cobalt resultin from the Dextro-Lac process.

By creating lactic acid more rapidly, more energy and protein is preserved in hay and silage for increased milk and meat production.
Part No: HY-SI10 \$187.00 Inc GST

SLASHER BLADES

It's that time of the year again- Silvan Spring Specials!
So call into Spare Parts between 10 September to 30 November
2012 and take advantage of the savings like this:

15 LITRE CHAPIN BACKPACK SPRAYER

Ideal for weed control, pest control and
fertilizers.

- ◆ UV stabilised tanks, Viton equipped
- ◆ 4 pressure settings from 15-60psi
- ◆ Easy operating spray handle for left or right handed use
- ◆ Three stage filtration
- ◆ Unique double lip gasket under lid to prevent spillage

Part Number: CP-61800

SPECIAL
\$138.00
WAS \$154.00

* Silvan Specials Disclaimer: Prices include GST, exclude dealer
installion and/or freight chargers.

Tamworth & Gunnadah Branches are open Saturday mornings from 9am to 12pm.

MONTHLY WINNERS

Congratulations to our New Holland **PINK** Cap Winners:

LA & KA Finlay - Boggabri, Woods Garage - Manilla, Roper River Agricultural - Mataranka

This month we have 3 NEW HOLLAND Caps to give away - simply return your payment by Monday 26th November 2012, to go in the draw.

We would also remind customers that we accept Visa & MasterCard over the phone and Debit cards may be used at all our Branches.

All payments by these methods are included in the monthly draw.

Electronic/Internet Payments on the last day of the month cannot be allocated until the next day - it would assist us greatly if payments could be made prior to the last day of the month to allow receipting and allocation to accounts prior to Month End.....thank you.

For customers that use Internet Banking, our bank account details are:

Commonwealth Bank

BSB: 062 602

Account Number : 00 272 029

Please use your account number, name or invoice number as a reference.

Joke of the month - "Finished and Complete"

No English dictionary has been able to explain adequately the difference between the two words.

In a recently held linguistic competition held in London, England attended by the best in the world, Samsundar Balgobin, a Guyanese man from Bachelors Adventure, was the clear winner with a standing ovation lasting over 5 minutes.

Here is his answer which made him receive an invitation to dine with the Queen who decided to call him after the contest. He won a trip to travel the world in style and a case of 25 year old Eldorado rum for his answer.

His final question was this.... How to explain the difference between COMPLETE and FINISHED in a way that is easy to understand. Some people say there is no difference between COMPLETE and FINISHED .

Here is his astute answer

When you marry the right woman, you are COMPLETE. And when you marry the wrong woman, you are FINISHED. And when the right one catches you with the wrong one, you are COMPLETELY FINISHED!

Kristen Alchin has been with us since 16th July 2012 as our new Accounts Receivable/Receptionist. Kristen has worked in office administration since 2003 in Tamworth and Brisbane. On Friday, 28th September 2012 Kristen married Rowan Searle at the Pavilion Function Centre, Nemingha. Jamie Rutter from the office attended the wedding and said it was a beautiful day. Kristen looked stunning and Rowan scrubbed up alright too! Goodwin Kenny wish Kristen & Rowan all the best for the future as a married couple.

I love the photo with the old tractor!!

ROTARY CLUB OF TAMWORTH SUNRISE - BATTLE OF THE BRAINS

Goodwin Kenny entered a team in the Battle of the Brains – our team name was Goodwin Kenny “circulus amicorum” which means Circle of Friends. The team consisted of Margie Pink, James and Jodie Vince, Con and Jenny Smit, Tony and Sharon Housden and

Margie Pink, Susan Goodwin, James & Jodie Vince

Susan Goodwin. Of all the categories which included General Knowledge, Science, History, Sport and some Brain Teasers we excelled in the field of Music!!

Thankfully we scored about the middle of the scoreboard of the 23 teams who participated and had an enjoyable night. Maybe we will do better next year!

Con & Jenny Smit, Sharon & Tony Housden

The Rotary Club of Tamworth Sunrise raised approximately \$6,700, which they will be donating to local charities in the next few months.

Susan Goodwin....
