

GOODWIN KENNY

Tamworth • Gunnedah • Armidale

NEWSLETTER

MARCH 2014

The Finlay family at Gli-don, Mullaley have been long time Goodwin Kenny customers dating back to the mid 1960's. Don Finlay saw the opportunity to supply wheat stubble as feed as the drought took hold and needed loader tractors, hay rakes and a baler. Negotiations saw the Finlays take possession of two new New Holland TD5.110 tractors with Challenge loaders, a New Holland BR7060 round baler and two 11 wheel in-line Tonutti hay rakes. The tractors are a good match to the round baler which has been working overtime as feed demand has increased in the last month. From reports Don is more than happy with the simple operation of the machinery. Pictures show the TD5.110, Don with the other TD5.110 and BR7060 ready for more action and Tonutti rake with round bales in the paddock.

Tom & Michelle Cutcliffe at Nemingha were frustrated by the unreliability of their old Case small square baler and having to borrow a neighbour's baler to finish, so Tom and Michelle decided to upgrade to a new BC5060 New Holland baler. Also key in the decision was access to Goodwin Kenny Hay technician Merv Leard's skills to set up the baler and "tweak" it for Tom and Michelle to produce the very best bales they can. A hydraulic swing kit was added to make the change from baling to travel positions. The light kit, fitted standard, helps to see what is going into the pickup and how the stack on the accumulator is forming while still being useful to inspect the knotters should anything go amiss. Pictured at delivery is Goodwin Kenny Salesman Tony Housden, Tom Cutcliffe and Goodwin Kenny Hay Technician Merv Leard.

Leon De Groot of "Waterford", Gunnedah has recently taken delivery of a new Great Plains Simba Xpress speed disc. This 22 disc unit covers 3.0 metres and front and rear gangs are independently adjustable by a simple winder mechanism for aggression of cut, infinitely variable from zero through 25 degrees to provide a suitable setting for cultivating or planting in previously worked or virgin soils. Each disc is independently mounted on a heavy duty spring line allowing discs to follow ground contours with travel distance of 120 mm. Being linkage mounted the Simba Xpress is extremely manoeuvrable for those tight spots around trees and in irregular shaped blocks and the cage style crumble roller packs the tilled soil leaving a nice herringbone finish. Leon contracted Goodwin Kenny to fit a Davimac small seeds box with increased capacity hopper [180 litre], and driven by the crumble roller, to the Simba Xpress, creating a unique planting/cultivating machine which can be utilised as a precision planter, primary and secondary disc cultivator as well

as being the ideal mechanical control for non-productive weed species such as Lippia, burrs and thistles. Over the past few weeks Leon has tried this unit in a variety of situations and is delighted with the results.

NEW HOLLAND Tractors in Stock

New Holland T5.95 at Tamworth

New Model, 4 cylinder Common Rail Diesel,
16 Forward x 16 Reverse Push Button Semi Powershift
with Electro F-R Shuttle

New Holland TD5.110 at Gunnedah

All new economy tractor, 4 cylinder 110 horsepower,
12 Forward x 12 Reverse Powershuttle Mechanical gears

3 Year / 3000 hour Warranty

With a need to spray and the desire to do it easier, Bob Johnston at Loomberah has upgraded from his 400 litre sprayer to an 800 litre Silvan Pasture Pack Linkage Boomspray with an 8 metre nozzle protected boom and 14 litre Foam Marker. Bob also has some steeper/rougher country and for this the sprayer has been fitted with a 2 sided Boomless nozzle kit, leaving the main boom folded up for protection, the boomless nozzles can cover up to 9 metre with no risk of boom damage. The Silvan Pasture pack range uses the proven Comet brand diaphragm pump, 2 stage filtering, quality Tecomec/GEOLINE control valve and nozzle bodies. The Pasture Pack also incorporates

a 15 litre fresh water tank for hand washing and rinsing nozzles etc., fully adjustable boom height, adjustable hitch height and a spot spray hose reel and gun. Bob is pictured at right looking pretty pleased with his new purchase.

Robert Sinclair at Quambone had a win while helping out on his uncle's newly acquired neighbouring property – quite a few tonne of pit silage was found, the only problem - no way to get it out!

The Challenge Spiked Silage Grab was chosen because of its ability to handle silage that was put down in varying ways – baled or chopped and has a capacity of $\frac{3}{4}$ m³. The silage, while having some spoilage, has been well liked by the sheep and cattle.

Tillage and Seeder Maintenance

In the last few weeks we have seen an increase in sales of tillage points and have noticed dirt being scratched up in some parts of the district, therefore, it might be opportune to mention some of the maintenance issues you need to consider.

Check the frame and hitch bolts on your machine – are they tight? if the tines are bolted to the frame, check they have not come loose and started to move around.

Check the frame and mountings for cracks - we have seen 1 set of discs with the bearing hanger broken off and another that has been cracked for some time – welding required.

Check the tine pivots, springs and/or hydraulic rams for worn surfaces, out of alignment or other damage. Offset discs, **check that bearings are not too worn**, can you get grease into the bearings properly? Is the main gang bolt tight? Do not allow discs to wear down too far.

Do not allow points to wear too excessively – this can lead to lost points that can stake tyres later on, additional wear on tines and areas of ground that are not cultivated properly.

Hydraulic hoses and rams – check for leaks and damage. Please remember to use safety stands or blocks before you crawl under the machine. Remember to **grease your machine** before storing it for any period of time.

An hour or two checking over the machine could save you many hours of paddock breakdown.

Submersible Pump

1 ONLY
MUST GO!!!

The 240-volt submersible pump can be used for transferring clean water from any tank and is ideal for above and below ground tanks.

- Max. Pump Rate: 500L/h.
- Max. Head: 30m.
- Max. Depth: 6m.

Part No: CP900S
SPECIAL PRICE
\$135.67 Inc GST

Fire Fighting Hose Kit

1 ONLY
MUST GO!!!

Consists of a 20 metre fire fighting hose, nozzle, 6 metre suction hose & foot filter.

Part No: LBA-100A
SPECIAL PRICE \$147.00 Inc GST

Agpoint Following Harrows

Part No:

HA3x3FH...\$153.79
HA4x3FH...\$209.00
HA3x5FH...\$248.02
HA4x5FH...\$323.84

GET YOUR SPRAYING SORTED WITH SILVAN

CHAPIN PRO SERIES HAND SPRAYERS

- Suitable for insecticides, fertilisers & herbicides
- Equipped with Viton seals and gaskets
- Corrosion resistant spray lance
- Surespray anti-clog filter in the tank
- Suitable for diesel
- Supplied with 3 different nozzles: adjustable brass, plastic and flat fan plastic.

< 7.6 Litre
Part No: CP-26021
\$94.00 inc GST

11.4 Litre >
Part No: CP-26031
\$109.00 inc GST

15 LITRE CHAPIN BACKPACK SPRAYERS

- Ideal for weed control, pest control & fertilisers
- Viton equipped
- 4 pressure settings from 15-60psi
- Handle for left or right handed use
- Three stage filtration
- Spill free lid (even when tilted)
- Supplied with 3 different nozzles: adjustable brass, plastic and flat fan plastic.

IDEAL FOR
WETTABLE
POWDERS

< Diaphragm Version
Part No: CP64800

OPEN SATURDAY MORNINGS - Tamworth Branch from 9am to 12pm. Gunnedah Branch from 8:30am to 11:30am.

MONTHLY WINNERS

Congratulations to our New Holland Cap Winners:

PJ & JA Holledge - Gunnedah, AB & GF Jarrett - Timbumburi, JM & P Begg - Blandford

*This month we have 3 **GREAT WESTERN TILLAGE** packs to give away - simply return your payment by Tuesday 25th March, 2014 to go into the draw. We would also remind customers that we accept Visa & MasterCard over the phone and Debit cards may be used at all our Branches.*

All payments by these methods are included in the monthly draw.

Electronic/Internet Payments on the last day of the month cannot be allocated until the next day - it would assist us greatly if payments could be made prior to the last day of the month to allow receipting and allocation to accounts prior to Month end.....thank you.

For customers that use Internet Banking, our bank account details are:

Commonwealth Bank

BSB: 062 602

Account Number : 00 272 029

Please use your account number, name or invoice number as a reference.

MOONBI/KOOTINGAL MOTOR SHOW & HISTORICAL MACHINERY EXHIBITION 8 & 9 MARCH 2014 MOONBI SHOWGROUND

Vintage Cars, Trucks &
Tractors, Trade Stores,
Swap Sites, Antique &
Collectables & more.

\$5 Adults, \$3 Seniors, Under 16 Free.

Why Seniors still need newspapers

I was visiting my daughter last night when
I asked if I could borrow a newspaper.

"This is the 21st century," she said.
"We don't waste money on newspapers.
Here, use my iPad."

*I can tell you this.
That fly never knew what hit him!!*

A little bit of history:

Goodwin Kenny sold and serviced CLAAS from 1963 to 1967 and one of the first Claas header purchasers was the Finlay family from Gli-don at Mullaley. Don Finlay recalls that they paid 6,400 pounds for the Matador Giant and that the Bank Manager chastised his father for spending so much money. I am sure the Bank Manager was not the one doing the harvesting, and if he was he would have appreciated the technology and update in methods, and it makes you wonder what he would think of today's combine harvesters.

On leaving Don's property after delivering the new Tractors, Baler and Rakes (see the front page) Peter Kenny spied a "Blast from the Past" in a Morris 43 Tyne Chisel Plow. This Series 5 machine was assembled by Don and his father and it was done in the yard at Mullaley Road in 1971—apparently, according to Don, Pat Kenny did not have the time or the manpower to put it together during this busy time of the year so the Finlays undertook the job themselves to get it done so they could use it!! Peter Kenny tells me that he and his brothers, Mark and Mick, when they commenced their apprenticeships in 1979 built many similar machines under the gum tree at Mullaley Road.

Just to keep you up to date:

- **Keith McPhie** from our Armidale branch has just had Heart Surgery and his wife Carleen informs me that he has come through the surgery well. While Keith is away the Armidale branch is open for business as usual and is being capably manned by Peter Mackay, so if you need parts call in to Armidale. We wish Keith a speedy recovery.

- **WorkCover NSW Rebate Program expires 30th April 2014**—under the category of Working Safely with Tractors rebates can be obtained for Rollover Protective Structures (ROPS), Runover prevention solutions—side access steps and platforms, Power take off (PTO) guards for tractor attachments.

For more details go to workcover.nsw.gov.au or call 13 10 50

- The Australian Government Whitepaper on Agricultural Competitiveness submissions close 17th April 2014—if you would like to know more or make comments to the government go to: agriculturalcompetitiveness.dpmc.gov.au

- Walcha Show is on March 8th and 9th.

- Parking at Tamworth still seems a bit confusing for our customers. **Customers can park in the Loading Zone** while they are purchasing parts or visiting our office—this is legal, Parking on the Footpath is illegal and also dangerous. If you have a trailer behind your vehicle there is limited off-street parking— if unsure please ask, we will be happy to help.

- On a lighter note — A new study has found that women with large backsides live longer than the men who mention it !

....Susan Goodwin
